Join us for an afternoon to learn about bear safety! This workshop is targeted specifically at safety concerns for southwestern Alberta farm and ranch owners, workers, and family members (all ages welcome) as they go about their daily routines, living and working in close proximity with grizzly and black bears.

Learn:

- How to minimize attractants around your ranch/farm and yard
- How to avoid bear encounters
- What to do when you do encounter a bear
- How to correctly identify dangerous bear behavior
- How to respond appropriately

**Get hands-on practice using bear spray and take home a can of bear spray\* for your family to use** (\*limited number available).

*There will be separate activities for younger children.*

*Beverages and snacks will be provided.*

*Dress for the weather - bear spray practice will be outdoors.*
